

WE CALL IT ROOF APPEAL.

UNI-SOLAR.

Power**Shingle**™

THE POWER TO TURN HEADS.

It's okay to stare. We get it. Solar isn't supposed to look this good, let alone produce this much power. But that's what happens when you set out to change the landscape of home energy.

Meet *PowerShingle*[™]. Solar that's designed to fit you. Your style. Your home. Your roof. No bulky panels or heavy frames, just a solar roof that's stylish enough for the front of your home, with the energy to power it.

In fact, it's the whole package. Good looks. Power. And functionality. Because of its patented waterproof polymers, it becomes more than just a product on your roof. It is your roof. A better roof. A solar roof.

Plug in to 25 years of innovation that's powering the world's leader in rooftop energy, and you'll understand first-hand, that power and looks can come in one package.

UNI-SOLAR®

WHY PowerShingle™

INTEGRATED DESIGN

The architects' choice—a solar integrated roof shingle requiring no added substructure. PowerShingle is able to uphold the aesthetic integrity of various roofs by fitting the contours of each surface and seamlessly blending into any design.

SMART MONEY

With the fastest payback of any solar investment, PowerShingle is the smart choice for your money.

EASY INSTALLATION

Light and easy to handle, PowerShingle is designed with our roofing partner, CertainTeed®, to be installed in the same manner as current roofing products.

DURABLE & RELIABLE

Waterproof, Glass-free and encapsulated in UV-stabilized polymers, it holds up against Category 3 hurricane winds, hail, and other heavy impacts, and comes with a 25-year warranty.

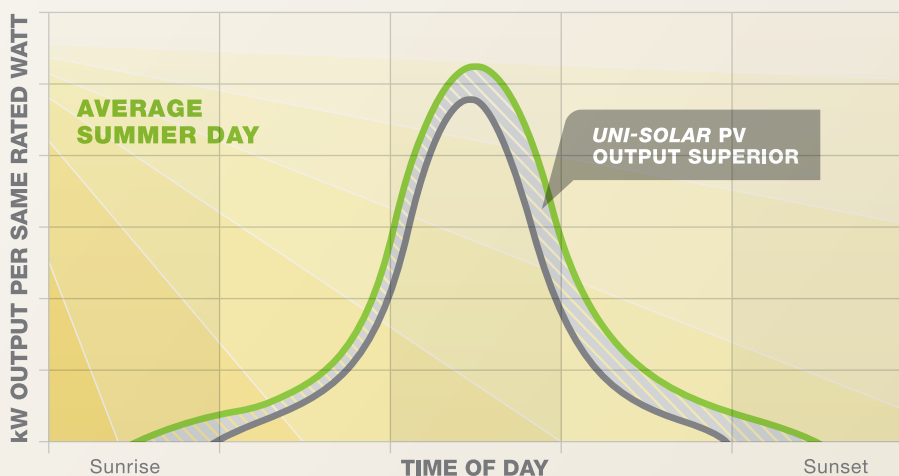

SAFETY

PowerShingle is UL-listed and California Energy Commission compliant.

BEST ENERGY PRODUCTION

UNI-SOLAR PV Output

Crystalline PV Output
